

Reading Code Together

When you come in, line up from the front of the room to the back of the room in order of birthday (month and day, not year).
January in the front of the room, December in the back.

Question of the day (and roll).

In groups of 2 or 3, read and fix (debug) code

```
Console.WriteLine("This is a test");  
Console.WriteLine("This is only a test")  
Console.Writeline("What is wrong with this line?");  
Can you fix // these lines?
```

```
Console.WriteLine("Something new.");  
Console.WriteLine("What does \tthis do?");  
Console.Write("How\nabout\nthis?\n");  
Console.Write("What about this \\?");
```
